TELEGRAMS

(via Galveston.)

Madrid 21st.—The Anarchists are keeping the people in a state of alarm, by their destructive manœuvres. The police to-day surprised several of them in a cave, engaged in making dynamite bombs. They fled on being discovered. Troops have been sent to several places to forestall any outbreak.

New York, 21st—The *Herald* of this city publishes a telegram from President Montt to the Chilian Minister in Washington, authorizing him to publicly contradict that there is any animosity in Chile against the United States, and say every effort will be made to settle the pending question in a friendly way satisfactory to both countries.

Paris 21st—The Cardinals and Archbishops of Toulouse, Rheims, Rennes, Paris and Lyons have protested against the interference of the Government with the Church, begging that religious liberty be respected.

London 21st—The funeral of Cardinal Manning took place to-day in Brompton Oratory. The Queen and the Prince and Princess of Wales were represented by high Court functionaries. All the Ambassadors of foreign Powers were also present.

Paris, 22nd—General Francois Grenier is dead.

Vienna, 22nd—The approaching marriage of Archduchess Stephanie, widow of Crown Prince Rudolph, to Prince Miguel de Braganza is announced.

Tangiers, 22nd—The revolt in the environs of the city is dying out, due to the steps taken by the Governor, by order of the Sultan.

London, 22nd—The city is shrouded in a dense and impenetrable fog, similar to that which prevailed at Christmas and caused the loss of many lives.

Vienna 22nd—The Archduke Francis Ferdinand, heir to the throne, is ill.

Washington 22nd—The warlike tendency of public opinion is calming down; nevertheless, the war preparations are continued.

Captain Schley, of the Baltimore, has received orders to confer with Minister Tracy.

London 22nd—Prince Victor Hohenlohe is dead.

New York, 22nd—A fire in Union Square yesterday resulted in a loss o $650,000.

FARMING THE TAXES.

There is, it appears, a proposal before Government on the part of a strong syndicate in Paris to buy up the Tobacco-tax in Argentina for a number of years, the Company agreeing to pay down in hard cash a sum of £10,000,000 sterling. It is a tempting offer, especially at the present time when the Government is in so embarrassed a condition. Only a few months ago it was found necessary to make a special issue of $1,500,000 in shinplasters to pay the schoolmasters. The apprehension, therefore, of the Argentine Government selling the taxes of future years is not "an air-drawn dagger of the mind" but something that may shortly be verified by the event.

On one condition we should gladly consent to a transaction of this kind, namely that the whole of the money thus obtained would be devoted to the reform and redemption of the currency, say at 12 pence per dollar. The actual amount of shinplasters is about 300 millions, representing at the above rate of exchange £15,000,000 sterling. In order to reopen the Oficina de Cambios, and give gold or silver on demand in exchange for notes, we should require a stock of two-thirds, say x10,000,000: in some countries a gold or silver reserve of 50 per cent is found enough to maintain convertibility, but in our case 67 per cent would be necessary.

It is needless to point out the immense benefits that would at once result to the country from fixing the value of the currency in the way that we propose. Some people, no doubt, would prefer to see the currency fixed on a basis of 24 pence, but that is now impossible, in view of the enormous amount of shinplasters, the volume of which has been increased by nearly 110 millions in the 18 months that have elapsed since the overthrow of Juarez-Celman.

There is hardly any sacrifice that we should not make to fix the value of the currency by returning to specie payments, provided that a law were passed at the same time condemning to perpetual banishment any Minister, Senator or Deputy who should hereafter propose to issue inconvertible paper money or to sanction its use in any form, unless the Republic were invaded by a foreign foe.

But if there be really no desire in the Government House to reform the currency—if the Presidents and Ministers, one after another, believe "the more paper-money the better", then we must emphatically condemn this project for selling the taxes of futurity, as a new device of the Enemy of Mankind to sink the republic in never-ending woes.

The Argentine Government has no longer its State Railways; they have been sold, and no man knoweth what has become of the money. It has mortgaged the future of the country. Nothing now remains but to sell the taxes, in order to complete the ruin of the Republic.

We may observe in conclusion that the system of farming taxes has already proved most disastrous in Santa Fé, where the Contribution tax for 1892 was estimated at $1,122,000 and has been sold to a "fermier" or speculator for $702,000. The French Revolution of 1789 was in great measure brought about by the exactions of the Fermiers Generaux, and we sincerely hope that this kind of farming may never meet with acceptation in Argentina.

WANTED A GOLD-FIELD.

In the midst of the depression that has ensued from bad government and worse finances there is one thing that we cannot help sighing for, and that is a gold field of the richest ore, and covering a wide area of the upper provinces. Every five or ten years we hear, indeed, of the discovery of auriferous deposits, but the ore is too poor, or the quantity of gold obtained by washing is too insignificant, to repay the cost of working. For some time we had great faith in Cuñapirú, on the northern frontier of Banda Oriental; then the Aconquija gold-fields in Catamarca came into notice; subsequently the Carolina mines of San Luis gave much promise and in later times the Santa Catalina washings in Jujuy, and the Cape Virgin gold-fields in Patagonia.

One and all have so far resulted in disappointment, but the fact that gold has been found in so many parts of this country, and in places so widely apart, gives ground to suppose that the precious metal must exist in large quantities somewhere, and that its discovery has been retarded by the circumstance that Argentina is still very thinly populated.

As soon as another Ballarat or Bendigo be found in this republic it will produce a great transformation in the state of things, put an end to the crisis and replace the present nasty and filthy paper-money by the real standard of value. Nor is it merely a dream, for the gold is in the bowels of the earth, and what is needed is an application of human wisdon and energy to find out the hiding-places of so much treasure.

LATEST FROM MONTEVIDEO.

January 22.

It was again rumoured yesterday that the Finance Minister had sent in his resignation. The rumour is to-day denied by the official organ. The Minister's resignation would imply the complete failure of the negotiations in London for starting the new bank. In the meantime the Chamber of Deputies has received no summons as yet to meet to discuss the Bank Bill.

Another fatal case of "beri beri" is reported in Flores Island. There are two other cases which will probably terminate fatally. The Bacteriological Institute is studying this disease, which is supposed to be caused by a microbe.

Dr. Duvimioso Terra has left with his family to settle in B. Hyres.

The *M. V. Times* gives the following in reference to the wreck of the John Elder:—

Yesterday's telegrams, although rather barren in details, fully confirm the news of the wreck, which took place on Sunday morning and is attributed to the vessel grounding in a fog. Punta Carranza, the scene of the disaster, is about 170 miles south of Valparaiso (which the John Elder left on the Saturday) and about 30 miles from Constitucion. It forms a turning point in the southward route of the vessels. It is always regarded as a dangerous place, as it is subject to fogs, especially at this season. The land lies very low, and the water is so deep that the lead cannot be used, consequently the vessels can only proceed under observation. When she struck, the passengers were landed in seven of the ship's boats; the port authorities giving every possible assistance. The mails were taken by the steamer Puchoco. There was about 4000 tons of cargo on board, looked upon as completely lost. The passengers, it is believed, have gone back to Valparaiso.

PROVINCIAL NEWS.

Further details were received yesterday from Mendoza concerning the murder of Messrs. Suarez and Narvajas. Mr. Suarez's house was attacked from the street and the back by two bodies of armed men, who forced their way to the dining-room. Mr. Suarez was seated at one end of the table, Mr. Narvajas at the other. The assailants fired and killed the last-named. Another account, however, states that a free fight ensued, and that a son of Mr. Suarez, rushing into the room and seeing his father fall near Mr. Narvajas, pulled out a revolver and shot the latter through the heart. A third account says that Mr Suarez, hearing an unusual noise and suspecting that something had gone wrong, rose from his chair, took down a rifle and went to the door. He there saw the assailants, upon whom he fired several times, but feeling himself wounded, he returned to the dining-room. At the same time Mr Narvajas rushed to the door and received a bullet through the heart. Mr Suarez received two bullets in the hand and a third in the lungs, and there is no hope of his recovering. The assailants fled, leaving two of their number dead in the passage. When the police made their appearance, the assailants were far away. The Police-Commissary of the section stated that he heard no shots and would have known nothing of the affair, if a policeman had not summoned him to the scene of the fight. The general feeling in Mendoza is one of consternation. People are afraid to venture into the streets, which are patrolled by mounted police. A few arrests were made on Wednesday night, but so far the police have not been able to capture the ringleader who, is supposed to be a man named Donoso. In the meantime the National Government has named Mr. Francisco Uriburu interventor, and declared the province of Mendoza under a state of siege.

The National Interventor goes to Mendoza with troops under the command of General Luis Maria Campos. So, caveant Radicals.

The news from La Plata is that the honorable senators there are thinking of levying a fresh tax this time on the railways. The public, of course, indirectly pay the piper. The tax will fall on railway tickets, it being proposed that each ticket pay the province five cents. Where are the minister's promises not to levy fresh taxes? The best thing for the province to do is to get some French tailor to offer a rattling sum for a monopoly to clothe every inhabitant of the Province. The National Government seems inclined that way, since it has not yet said no to the French proposal to take over the tobacco trade of the country for ten millions sterling. Things have come to a pretty pass when our rulers are reduced to thinking of selling privileges and monopolies, which are against the spirit of republican institutions.

They have had some rain in Mar del Plata, and social enthusiasm has been somewhat damped thereby. Many families returned yesterday. The hotel-owners have been having what our North American cousins call "a high, old time of it."

ARGENTINE GUARANTEED RAILWAYS.

(*From the "Financial Times".*)

A great deal of heartburning has been caused by the recent action of the Argentine Government with regard to those railways which have a national guarantee. It is not very easy to put the case generally, because some of the earlier railway guarantees were in different form to the later ones. For instance, the guarantee to the Buenos Ayres and Pacific Company, it is not disputed, was given originally on the terms of a return to the Government of 50 per cent. of the gross receipts. On the other hand, the law of concession of the Argentine North-Eastern Railway distinctly states that whenever the *net* proceeds of the "railway shall exceed 6 per cent" (the interest guaranteed) "the concessionnaire shall return to the nation the total excess, until it shall have completely remburged the amount received on account of the guarantee, with 6 per cent interest." Further, in reply to a requisition from the contractor of the Argentine North-Eastern Railway, the Finance Minister telegraphed: "Government will pay guarantee railways in Corrientes and Misiones half-yearly in gold without reference to working expenses." The difference between the two guarantees is obvious. In the first case, it is clear that, under certain circumstances—which, no doubt, seemed impossible at the date of the concession, but which are now, unfortunately, being realised—a return of 50 per cent. of the gross receipts might mean that the line could not pay its expenses, and would have to stop working, although a certain interest were guaranteed on the capital; in the second case, the Government would only have a right to the surplus receipts after payment of expenses, subject to the deduction of the guaranteed interest if there were any surplus. The possible hardships of the first case were, it seems, recognised, and a law was passed in 1888 which provided for the return to the Government of only the surplus receipts over expenses. This law, however, has just been repealed, and a return to the old obligation of payment of 50 per cent of the gross receipts has been decreed.

Naturally, this has created most intense dissatisfaction. In the extracts which we published yesterday, the decree appeared to refer only to back returns due from the Buenos Ayres and Pacific Company prior to the law of 1888; but at the offices of the company we are informed that the decree is a general one, and the Villa Maria and Rufino—to mention one company—already finds that it is impossible to continue business on such terms. With paper at a discount of 280 per cent, the expenses are obviously higher; that is to say, the receipts are much less in proportion to the working expenses. At the same time it is pointed out on behalf of the companies that the Government is not paying its guarantee in gold as agreed, and that the bonds of the Funding Loan, which are given in lieu of the gold, are only quoted at about 57. Therefore, while some lines may be compelled for a time to work at a loss, the guarantee only realises 57 per cent. of the proper amount. This is hitting unfortunate investors in the guaranteed railways on both sides of the check, and the situation cannot be allowed to remain as it is. The following list contains the names of the companies with guarantees which are best known over here:—

Amount of guarantee.	Company.	Guarantee per cent.
£2,800,000	Argentine Great Western.....	5
2,312,340	B. Ayres and Pacific.....	7
432,000	Do. Mercedes Extension.....	7
1,491,000	Transandine....	7
4,716,260	Bahia Blanca & North-Western	5
4,166,000	Cordoba Central (Cent. Northern Section)	5
969,600	East Argentine	7
5,000,000	Argent. North-Eastern	6
808,910	Villa Maria and Rufino.....	6

It will be seen from the above list that there is a very considerable sum at stake in the guaranteed railway companies.

But now, on the top of the difficulties already mentioned, there is another grievance which seems equally serious. While, under one pretext or another, the delivery of the bonds in lieu of the guaranteed interest in gold is in arrear, the deal made with the Entre Rios Central Railway is about to be consummated. Under this arrangement the Entre Rios Central was to receive £500,000 in Gold Funding Bonds in settlement of all claims for interest now and in the future. Inasmuch as it is estimated that the claims of the railway for interest this year could be settled for £12,000, the bargain appears to be a remarkably good one for the company. There is, therefore, no reason for astonishment that rumours should be flying round that one high Argentine official, at least, will receive a considerable "douceur" for his services in the matter.

It is quite certain that if the process of paying down large amounts—even if advisable as a composition—be continued, the Funding Loan will be exhausted long before the end of 1893. The total amount of the Funding Loan authorised by the law of January, 1891, was only £14,880,000, and the amount was arrived at without having the Entre Rios arrangement under consideration. As our correspondent says, the matter deeply concerns the Bank of England, the Baring guarantors, and the issue house of the Funding Loan, and ought by them and all the railway companies to be obstinately resisted.

Note of "Standard."—We regret to see editors of London papers continue to talk of 280 per cent discount. If you discount 100 per cent nothing remains. It is only in Ireland that landlords complain of their rents having been reduced 150 per cent.

BANK SHAREHOLDERS' LIABILITY.

A very important point of company law has been brought into prominence in connection with the liquidation of the English Bank of the River Plate. At the meeting on Tuesday Mr. Stewart, the Official Receiver, who presided, notified to the assembled shareholders that not only were they liable for the uncalled portion of their shares, but also in respect of the note issue at Montevideo, amounting to about £160,000. Under the Uruguayan law the holders of notes have a preferential claim on the assets, but the Official Receiver has been advised by counsel that under our own Companies Acts the shareholders of the English Bank have incurred the additional liability referred to, which amounts to over £2 per share. It is not surprising that this intelligence has created some consternation among the shareholders, who, already cognisant of their liability to the extent of £10 for every share they held, thought they already knew the very worst. Unfortunately, there is too good reason to believe that Mr. Stewart's announcement conveys only what is actually the fact.

In the Companies Act, 1862, the liability of banking companies in respect of their note issue was clearly defined in Section 182, which ran thus: "No banking company claiming to issue notes in the United Kingdom shall be entitled to limited liability in respect of such issue, but shall continue subject to unlimited liability in respect thereof, and, if necessary, the assets shall be marshalled for the benefit of the general creditors, and the members shall be liable for the whole amount of the issue, in addition to the sum for which they would be liable as members of a limited company." By the Act of 1879, however, this section was repealed, and the following enacted in its place:—"A bank of issue registered as a limited company, either before or after the passing of this Act, shall not be entitled to limited liability in respect of its notes; and the members thereof shall continue liable in respect of its notes in the same manner as if it had been registered as an unlimited company; but in case the general assets of the company are, in the event of the company being wound up, insufficient to satisfy the claims of both the note-holders and the general creditors, then the members, after satisfying the remaining demands of the note-holders, shall be liable to contribute towards payment of the debts of the general creditors a sum equal to the amount received by the note holders out of the general assets of the company."

Section 182 of the Act of 1862 thus referred only to banks claiming to issue notes in the United Kingdom, but the substituted clause in the Act of 1879 has no such limitation. It applies to "a bank of issue registered as a limited company," so that, whether the notes be issued in this country or elsewhere, the shareholders are liable. Indeed, it would appear that the express purpose of the substituted clause was to abolish the limitation and to extend the liability. The legal luminaries to whom the question has been submitted express the opinion that there is no doubt on the point, which is one of some importance to holders of shares in English banks which issue notes in foreign countries. In most instances the contingency of a bank's failure is so remote that the liability on the uncalled capital is not taken very seriously into consideration, and, again, the uncalled capital is generally so great that a very extraordinary state of affairs must have been arrived at when this reserve liability is insufficient to meet every demand on the part of creditors in the event of liquidation. Still it is desirable that the position should be understood, and although the point has not come before the Courts, the legal opinion that has been sought is, as we have intimated, very explicit as to the meaning of the substituted section of the Act of 1879.

It is hoped, in the case of the English Bank of the River Plate, that not only will it be unnecessary to call upon the shareholders for the amount of the note issue, but that a portion of the £10 per share for which they are liable, apart from the amount of the notes, may be rescued from the wreck. The English creditors appear anxious to act in a proper spirit, and a scheme is now being formulated which will probably have an important bearing on the results of the liquidation. The creditors may have to wait for their dividends for a time, but they have the substantial consolation of knowing that the delay will be the means of increasing the amounts which they will ultimately recover.

PUBLIC OPINION ON THE TRAMWAYS COMPANIES.

Mr. Editor,

Thus Public Opinion to my friends, the Tramway Companies:—

Gentlemen managers: I note that you are much pleased with your new ticket inspection system. It is well. Do not, however, mistake this system for a public boon. You see, as a matter of fact, it benefits nobody but yourselves. By preserving your tickets, my good public merely assists you in looking after your own interests—that is all. Therefore, gentlemen, be not too diligent in glorifying yourselves. Above all, see that you furnish the public with "preservable" tickets, something like those of the C. de B. A. Tramway Co. Away with your gaudy, coloured cobwebs, transparent flimsinesses, semi-imperceptibilities, that shrink away into unfrequented corners of pockets.

I note with much concern that the 2 cent postage stamp nuisance still continues on some lines. This is most perceptible in your case, manager of the Alphabet Tramway. Why is it that you alone fail to supply your conductors with coppers? You tell me that a 2 cent postage stamp is worth 2 cents in copper. I grant that it is at the start. But by the time that stamp has been thumbed and crumpled by a dozen people, and been over town a score of times from Cinco Esquinas to Barracas, and from Plaza Victoria to Caridad, what does it represent? An emetic amongst other things.

Manager of the Belgrano Tramway Co., a few words with you. You might run a few fast specials from Plaza Victoria to Belgrano in the evenings. Also a few from Belgrano to Plaza Victoria in the mornings. I often see Belgrano people shut out from their own coaches by Palermo and Centro America passengers. A few more coaches per hour from and to Palermo, morning and evening, would be as much to the benefit of your Company as to that of the public. Time after time people tell you that. Why can you not see it? Or is it indeed true?

"Mit der Dummheit Kæmpfen Gotter selbst vergebens!"

Yes, you have improved somewhat, but you have plenty of room still for improvement.

Che Buono.

THE LATE CARDINAL MANNING.

January 22nd

Mr Editor

You are getting very confused in reference to the final resting place of the mortal part of England's late illustrious Cardinal. You have already announced its deposition in Westminster Abbey, the Oratory, the Pro-Cathedral, and now you and your correspondent "Londoner" are becoming desperately involved between Moorfields and Southwark, and, fearing you may both lose your way in Seven Dials, I offer my gratuitous service as guide.

I need not inform you where Westminster is. Even a Londoner knows so much. The Pro-Cathedral of the Catholic Archdiocese of Westminster is, as you say, in the High Street, Kensington, nearly opposite Holland House. The Cathedral of the diocese of Southwark is St. George's Southwark. To get there you cross Westminster Bridge from the Middlesex side and go straight ahead.

There is no Pro-Cathedral in Moorfields, neither is there a Catholic Church dedicated to St. George. But there is a St. Mary's Moorfields situated between Finsbury Circus (where the Great Southern Railway has its offices) and the Broad Street Station of the North London Railway.

In the days of Cardinal Wiseman, and even later, St. Mary's Moorfields was used as the Pro-Cathedral.

In regard to the probable resting place of the late Cardinal it may be taken as a certainty it will not be Westminster Abbey, if for no other reason, for the very sufficient one that it would certainly be opposed to the Cardinal's well-known principles.

From his point of view Westminster Abbey is a desecrated place, and one can as readily conceive the burial of the Primate of France in the Pantheon. No, the Cardinal would certainly have desired to have his bones laid in consecrated ground, for whatever may have been the degree of his tolerant principles no one would mistake him for an indifferentist.

St. Mary's Moorfields and St. George's Southwark may both be left out of account. As regards the Oratory, which you know is next door to the South Kensington Museum, I do not think it would be the place selected by the Cardinal, who was never specially associated with the Oratorians. He strained every nerve to pay off the debt on the Kensington pro-Cathedral, devoting to that object the considerable sum presented to him on the completion of 25 years in the Episcopate, as well as his private means. Most likely he would have wished to be buried there. But two other possible places might be mentioned, viz: the chapel of St. Thomas's Seminary at Hammersmith, founded by the Cardinal for the education of clergy, and St. Mary's Bayswater, where Dr. Manning spent his life after being received into the Catholic Church up to his call to the Archiepiscopal throne of Westminster. The Church is associated with St. Charles Borromeo, Cardinal Archbishop of Milan, whom there can be little doubt our Cardinal accepted as his model in the exercise of his exalted office.

Having incidentally alluded to the Oratory, permit me to predict the possibility that a successor to Cardinal Manning will be sought for among the Oratorian Fathers. I preconise (is this the proper ecclesiastical term?) the present Superior of the London Oratory as "dignissimus."

Your obedient servant,
Aliquis

ED. NOTE.—We think that all Roman Catholics regard Westminster Abbey with the same veneration as Canterbury cathedral, the first on account of St. Edward the Confessor, the second of St. Thomas a Becket, and that Card. Manning would have had no objection to be buried there. The pilgrimage to the tomb of St. Edward, in December 1889, by 500 Roman Catholics, including several priests, shews that such is the feeling.

THE DUKE OF CLARENCE'S DEATH.

Mr. Editor,

The death of the Duke from a pulmonary complaint induces me to write to you, for I am in possession of an Indian remedy which cures the evil from the beginning. The remedy is very simple. It consists in rubbing the chest with the juice of a plant which I know and of which I have the seed. Nature supplies remedies for many evils. In the course of my travels I have acquired the knowledge of the marvellous properties of many indigenous plants. I am certain that the juice of the plant to which I have above referred would be an excellent preventive or cure for influenza.

Yours truly,
F. Benelishe.

THE RAILWAY OF THE FUTURE.

The railway of the future is the subject of an interesting paper by Herr Berdrow in a recent supplement to the Munich *Allgemeine Zeitung*. The author explains that the steam locomotive has practically attained its maximum speed, which for effective purposes can never greatly exceed 60 miles an hour. For the communication between great centres this is not enough, and experiments are in progress which aim at more rapid travelling, in the first instance, between Vienna and Buda-Pesth. The new railway is to be a special line for electrical express cars. There will be no trains, but single cars 50 yards long, propelled by electricity supplied to them from the rails, will follow each other at intervals of ten minutes. The speed to be attained is to range from 120 to 150 miles an hour. A number of special arrangements will be needed to make this speed safe. First of all, the movement will be too quick to permit of the ordinary signals being seen. A special system of signals has to be devised, and, as a further safeguard, the car can be stopped by the signal-man shutting off the electric current from his section of the line. Then, again, the resistance of the air will cause a mighty current as the car rushes on, and the up and down lines will have to be ten yards apart to prevent passing trains from blowing each other off the track. The rails will be heavy, and laid upon solid masonry. Curves will be avoided and steep gradients adopted in their stead, as the electrical force will overcome the steepness, while the pace would cause an upset on a curve. The extra cost of the line as compared with a railway line on the present system will be saved in the cheapness of the working expenses. Each car will carry about forty passengers, and, instead of trains running to a time-table, the cars will follow each other at a few minutes interval, each one starting as soon as it is full. The picture is certainly attractive. If the ideal thus set up can be realised, we shall be able to go from Manchester to London at any time in the day in an hour and a half, and the journey from London to Paris would occupy through the tunnel—of which for this kind of traffic even the Duke of Cambridge might approve—about three hours. Every one will wish well to the Austrian engineers who are at work on the scheme. An express car line, in spite of the tremendous pace is a less disagreeable prospect than that offered by Mr. Maxim's flying machine, though that too seems likely soon to become a reality.—*Railway Times.*

SHIPBUILDING IN 1891.

The returns of work done at the principal ports of the United Kingdom show that 1891 will rank as one of the most prosperous years in the history of the shipbuilding trade—that is, reckoning prosperity by the quantity of tonnage put into the water. The total is not quite so large as that for 1889, but it slightly exceeds that for last year, as the following figures indicate:—

	1891. Tons.	1890. Tons.
England	770,767	777,416
Scotland	399,541	416,617
Ireland	103,476	77,377
Total....	1,273,784	1,271,110

While the aggregate for the twelve months is in excess of last year, the experience of the respective building circles has been somewhat dissimilar. At most ports there has been a decrease in tonnage launched, but the increases at a few have so mounted up that the balance falls to the credit of the rise side. The details as to the principal rivers over the two years are:—

	1891. Tons.	1890. Tons.
Clyde.....	332,000	349,995
Tyne.....	185,367	235,567
Wear.....	192,150	197,482
Tees.....	121,022	127,741
Mersey.....	23,383	30,577
Barrow.....	31,444	24,665
Government Dockyards	68,100	22,520
Belfast.....	92,429	66,783
Hartlepool..	96,983	99,847
Thames.....	10,741	47,000

At what may be described as the minor ports, building has been immensely brisk, and though the vessels constructed were mostly small, they foot up to a heavy total, and so bring up the gross. This year there has been a large amount of Government work executed, not only in the dockyards, but in private yards, so that the addition to the mercantile marine is not so great as the figures at the first glance might be taken to imply. Still the increase under that head is certainly more than the position of the freight market and the outlook for trade warrant. As respects the prospect for 1892, while reliable data are difficult to procure, there is every reason to believe that a great addition to our merchant navy will be made. Orders have been freely placed of late, and the books of many builders are very well filled. There are some firms which could easily overtake more, but others are exceeding well provided. On the Clyde alone the tonnage on hand for 1892 reaches to close upon 300,000 tons, very little less than was on hand a year ago; but then it largely consisted of Government work, while now it is made up of private work.

RAILWAY ITEMS.

The N.R. Board have asked the Board of Public Works to order Messrs. Lucas Gonzalez and Co. to build culverts marked on the plans Nos. 73, 82, 96, 97, and three more near Jujuy station.

There is a lawsuit at present going on between Mr. Charles Wilkman and Mr. Anthony Pelacz, concessionaire of the Reconquista-Formosa Railway, in reference to the line.

The Pacific Railway and the Rural Tramway have finally come to an agreement in regard to the level crossings at kils. 22 and 51½. The plans are now before the Board of Public Works.

We note in the *Actualidad* of Parana a letter from Mr. Chevallier-Boutell, representative of the Entre Rios Railways Co. Ltd., to the Governor of the Province. The letter in question is in reference to wheat freights. H.E. asked Mr. Chevallier-Boutell not to increase these freights, at least not until March, and we are glad to say that the representative of the Company, who take over the railway next month, acceded to this request, on his own responsibility, while awaiting a favourable reply from the Board in London. Mr. Thompson is the new Manager of the railway. Mr. Chevallier-Boutell's decision has caused widespread satisfaction in Entre Rios, where the wheat interests are considerable.

Government has issued orders for the payment of $59,000 gold to the North-East Argentine, as guarantee for the second half of 1891.

EDITOR'S TABLE.

Delightful day yesterday: neither hot nor cool, but Sun, Wind and Co. judiciously mixed. There was no fresh political disturbance reported in Mendoza or anywhere else; and it is expected that when Mr. Uriburu gets to the grapy city he will be able to make things pleasant without having recourse to General Campos's bullets and bayonets.

Telegrams from London were received yesterday announcing the conclusion of the trial of Mr. Smithers. The jury found him guilty, and the Judge sentenced him to four years' imprisonment.

Yellow fever seems to have vanished from the daily news "menu". There is no "novedad" whatever in this unpleasant line.

The Governor of that nice province Santa Fé is in town. He comes to look for some cash to keep it going. When did a provincial Governor ever come to the capital without having money in his mind's eye? Echo answers, never

The Inspectors of Joint Stock Companies promise a spicy tale about a certain boom bank, to be published early next week.

A Commercial Treaty between Señorita Argentina and her venerable mother, Spain, seems to be on the tapis. The whole world seems to be getting commercial-treaty mad, except John Bull, who looks on, laughs, and rakes in the profits.

Cavalleria Rusticana is repeated at the Politeama to-night.

The Politeama was again crowded to the very portals on Thursday night, the great attraction being the repetition of Mascagni's Cavalleria Rusticana. The evening's entertainment began with the second act of that side-splitting Operette Satanella, which was very well rendered, Signor Marchetti coming in for the lion's share of applause. The baritone was also much applauded. After an interval of 20 minutes, the curtain rose, and the orchestra, which was well up to the mark, struck up the first bars of Mascagni's opera. Mdme. Bonazzo was most enthusiastically applauded and she was called before the curtain no less than three times. All the other artistes came in for a share of applause. In fact, the piece is a great success, and Signor Tomba is to be congratulated on his happy idea of giving it.

There was a "desorden mayusculo" yesterday evening in Calle Esmeralda corner of Piedad owing to the "intransigeance" of Inspector no. 9 of the city of B. Ayres Tramway, who called the police to make a passenger shew him his ticket. A great crowd gathered, and the Inspector came in for a deal of loud abuse, which he could easily have avoided by picking up the ticket, which the passenger in question refused to hand him. The tramway-inspectors won't make themselves very popular, if they get into rows of this kind. The other passengers in the tram were naturally highly incensed, since the car was delayed about half an hour in consequence of the row.

Lovers of the artistic and beautiful would do well to pay a visit some day in the course of next week to Messrs. Wilkes's bazaar, 635 Calle Corrientes, where there are now on view some mantel-pieces and fire-places for Don Adolfo Bullrich's quinta at the Tigre. There is especially a mantel-piece of Oriental pattern, the carving of which reminds one of the Pacha's Palace at Tunis. Messrs. Wilkes made all the work on their premises.

We have been somewhat disappointed at the very scanty notices in all the morning and evening papers (except the *Nacion*) of our late esteemed friend and former colleague, Don Palemon Huergo. It is not the first time that we have had reason to observe that the Press of to-day seems to have very little appreciation of the men of thirty years ago.

We find the following announcement in the *Montevideo Times*:—"We are requested to announce that Her Britannic Majesty's Representative here has received instructions from Her Majesty's Government that three weeks' general mourning and six weeks' court mourning have been ordered, to date from the 15th inst., on account of the death of H. R. H. the late Duke of Clarence and Avondale. A Special Service will be held at Holy Trinity Church on Sunday next in memory of the late Prince."

We fail to understand why we had not a couple of thousand visitors yesterday to inspect the Carlue wheat. The only bucolic subscriber who did drop in, in a perfunctory way, said it was very fine.

There is a good deal of talk and speculation in English-speaking circles as to the reasons for making the Duke of Clarence's funeral such a private affair. Nobody seems to know; so we must all wait three weeks for the papers.

The Lomas Choral Union will discontinue the fortnightly practices during the hot weather. The Secretary informs us that the meetings will probably be resumed at the beginning of March, and that due notice will be given of the date.

The Clerk of the Weather does'nt like the Montevideans. He almost baked them alive the other day, and on Thursday morning, while he sent Porteños a cooling rain, sent our neighbours almost hot water, and they are still complaining of the heat.

The latest news from Formosa is that the Havannah tobacco seed planted a few years ago by some of the settlers has turned out so well that the Vuelta de Abajo of Cuba is mere cabbage leaf compared with it.

The Boca had another narrow escape of the fate of Chicago on Thursday night. One of the wretched wooden shanties took fire, and only by heroic efforts on the part of the Bomberos was the whole dirty, wooden neighbourhood saved. Some day there will be a first-chop blaze in that Ligurian quarter that will serve as a warning for years to come.

We note that two of our esteemed colleagues are at loggerheads as to whether the company that frequents the Plaza San Martin Beer Gardens is "comme il faut" or not. A place of that kind is like a woman's reputation; once it is spoken of at all it is done for, as far as decent people are concerned.

A grand Mass will be celebrated to-morrow in the camp at Palermo, and all the troops will attend in full dress. There is no ceremony more imposing than a military Mass.

That tobacco and matches monopoly is about the most scandalous thing ever heard of in this country. The idea of even listening to such a proposal shows what our rulers have come to. We hear that an enterprising tailor in Paris is about to apply to Congress for a monopoly of all the clothes' making in the Argentine Republic for a thousand years.

Talk of crisis. In the month of December, according to the official municipal returns, $691,000 were lost and won in horse racing in this city: $73,500 spent on theatrical amusement, and $756,000 wagered on ball-playing. If the amount lost in lottery gambling could be accurately ascertained, it would probably exceed the others put together.

One of the prettiest sights in Madras early in the year is afforded by the waters of the Adyar river after dark. They are highly phosphorescent, and contain myriads of fish, both large and small. As the latter dart about on the surface or into the depths below, they leave streaks of pale blue light behind them, and the effect is the most charming imaginable. As far as one can see from a boat the whole river seems filled with lambent flames.

At their final debate on the Budget, the La Plata Senators clapped a tax of 5 cents on every railway ticket sold in the province. Senator Bermejo fought hard in opposition to this obnoxious tax: but it was carried by fifteen to 4 votes. This provincial Budget is as queer a kettle of imaginary fish as the National article, as will be shown before 1892 is dead.

The Swiss residents in the wheat colonies are organising a Monster Protest against the Santa Fe paper that called them "a pack of adventur

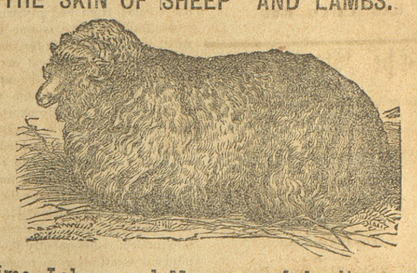
Hayward's Paste Dip
For the CURE of SCAB
AND DESTRUCTION OF ALL FILTH INFESTING THE SKIN OF SHEEP AND LAMBS.



Time, Labour and Money saved by its use.

Messrs. Moore & Tudor, Maipu 163, B. Aires.
Chascomus, March 23rd 1891.
Dear Sirs—
"I have tried HAYWARD'S "PASTE" DIP on my Sheep, and have pleasure in bearing testimony to ITS EFFICACY AS A DIP. I need have no hesitation in recommending it generally as a Cure for Scab, without discolouring or damaging the Wool.
The "PASTE" is in my opinion preferable to the Powder, and will probably have a larger sale than the latter."
Yours very truly
(Signed)
JOHN KELLIE.

It has been proved by many important Estancieros that HAYWARD'S PASTE is more convenient to use than any other Dip, being already mixed and dissolving in any kind of water. It makes a smooth soapy bath which adheres well to the Fleece and leaves the wool clean and soft.

ON 'CHANGE.

Friday, Jan. 22.

There was a better feeling in the market to-day, at least this was the general verdict, in view of the steady fall in the gold premium. We may add that the fall in gold did not arise so much from any general improvement in affairs as from over speculation in the bullish quarter; but it would be idle to argue any further in this regard, as it is axiomatic in the market that a fall in gold implies general improvement.

The National Government, after much dilly-dallying, has at last resolved to intervene in the Province of Mendoza, and the National Interventor is no less a person than Don Francisco Uriburu, the popular Chairman of the Bolsa. This appointment has put the whole Bolsa in great glee, as one of the most conspicuous members in the hall has been chosen to settle a political conflict in which the price of gold has much to say. It is not at all improbable that the Bolsa to-day signified its applause of the Government choice by putting down the gold premium.

The popular Chairman of the Bolsa is a well-known financier,

Freights are reported somewhat steadier, and the steamers in port manage to fill up at current rates. The tonnage in port is just sufficient for the business offering

Prices at the wool markets this morning were firm, but business was dull. The news from Antwerp is bad; to-day's telegrams announce that the public sales of wool opened in that market with a fall of ten centimes in prices.

The R.M.S. Trent is due on the 27th inst., with 400,000 sovereigns; she has already engaged a full cargo of produce for Rotterdam and Southampton.

The R.M.S. Clyde left Montevideo yesterday; she takes a heavy cargo of 3000 tons of wool, grain, hides, meat, tallow, etc.

The R.M.S. Magdalena is due on the 6th prox. with another consignment of four hundred thousand sovereigns for this market.

Telegrams from London announce that the Bank of England has lowered its discount rate to 3 %.

The news of the public sales in Antwerp, going on at present, are unfavorable; the opening prices show a fresh fall of ten centimes per kilo unwashed. The tendency of the sales is weak. Telegrams announce that combed wool prima corriente of Buenos Ayres, to deliver in January and February, are quoted at 4 to 4.25 fcs. per kilo—which was worth a fortnight ago 4.50 fcs. per kilo. Advices from Roubaix and Tourcoign state that the "marché disponible" for combed wools is very heavy, and cross Lincoln wools, which were in demand, are also unfavorably affected by the general situation.

The next Colonial wool sales will begin in London on Tuesday next. The enormous quantity of 350,000 bales will be offered for sale. The auctions will probably last a month. Telegrams received state that the sales will probably open under the closing prices of last auction.

We may here remark, in the light of the above advices, how accurate Mr. Lix Klett was in his views of the wool market, when in sundry articles he advised farmers and consignees to sell their wools at what were then most satisfactory prices.

To-day, we see, prices are declining in Europe, and to make matters worst an absurd propaganda has induced people to store wools here, which will make matters worse and increase the fall in prices. Let it be remembered that we are at the end of January, and it is calculated that there remain 300,000 bales of wool to be shipped from this market. Those who store wools await a rise in gold—but if gold does not rise what can they fall back on?

The gold market ruled steady at the second ring: over twelve thousand ounces were sold for to-morrow: the price opened at $61.70 and closed firm at $61.90. A few sovereigns were sold at $19.20 and $19.25. At five minutes to four the usual hub-hub began into a noisy contest to fix the closing price. In the speculative struggle there is a daily squeeze, scramble, and commotion in which hats and coats suffer, all for the sake of ten cents difference to fix a closing rate to suit the next morning's interests. There is no doubt a good deal of fun extracted out of this daily Bolsa scare, but it is not dignified, and the chief causes of the commotion are the financial concerns that have at heart the closing quotation. The market closed at 4 p.m., hard at 61.90$. There were many buyers on time to-day offering 40 cents contango.

Stocks and shares were neglected.

The following is a summary of the business effected in stocks and shares to-day at the second ring:—

South American Ounces—
Novillos—
Jan. 23rd.. £750 at 19.20-25.

10 Hipodromo Nacional.
10 Telegrafica-Telefonica.
5 Bristol Hotel.
200 Edificadora Floresta.

268 Scrip 15% of Italia Reasguaradora.

In reply to the petition by several of the private banks—Italia y Rio de la Plata, Sud Americano, Frances del Rio de la Plata, Roma y Rio de la Plata, Nuevo Banco Italiano, Caja de Descuentos and Banco de Comercio—demanding to rank as banks with their capital radicated in the country, a decree was issued yesterday declaring that the 10 per cent tax on the profits of private banks established by the Act of last October extends to all banks, whether their capital be radicated in the country or not; and that the exception invoked in favour of capital radicated in the country refers to other joint stock companies, not banks.

The returns of the Custom House to-day amounted to

Imports	$112,418.32	
Exports	18,760.84	
	$131,179.16	
	Gold.	$ m/n.

DAY. SON & HEWITT'S Veterinary Medicines

Mr. Wm. Kemmis, the well-known breeder of fine stock, writes as follows:—
Estancia Las Rosas,
Ferro-Carril Central Argentino,
10th Jan., 1891.

I consider that no estancia which has any stock worth giving medicines to ought to be without these medicines.

The GASEOUS FLUID is the very best colic medicine I have ever seen given to horses, and the RED DRENCH for any illness after foaling or calving or lambing is, I consider splendid.

Yours truly,
(Signed) W. KEMMIS.

TEA
LA MAGNOLIA

INJURIOUS TEA DRINKING.

In the "Daily Post" of September 2 appears a leading article—evidently from an analytical expert—showing that after 15 minutes "draw," Indian Tea yields 17·73 o/o tannin, while from China comes only 7·93. What this means few know, but those troubled with indigestion may realise in part by use of True China Tea for one week.

GUARANTEED PURE.

Beware of gross imitations of this well-known mark. Sold in tins of 1, 3, 6 and 12 lbs.

TO ESTANCIEROS.

Why use poisonous dips dangerous to both Man and Beast, and from the effects of which Estancieros are continually suffering heavy losses, and puesteros getting maimed, when you can buy

LAIDLAW'S TOBACCO POWDER

which is guaranteed perfectly harmless in use, costs less and never fails to cure the worst bases of Scab

Read one of the latests testimonials:—

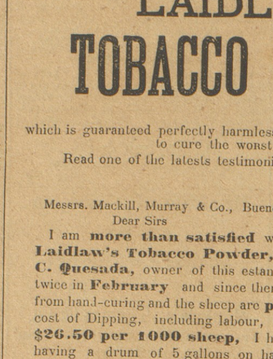
Estancia El Ombu
Ramallo, Oct. 21st, 1891

Messrs. Mackill, Murray & Co., Buenos Aires

Dear Sirs

I am **more than satisfied** with the result from dipping with **Laidlaw's Tobacco Powder,** and I may say that so is **Mr. C. Quesada,** owner of this estancia. I dipped the sheep (60.000) twice in **February** and since then have had hardly any work to do from hand-curing and the sheep are **perfectly sound to-day.** The cost of Dipping, including labour, was **$0.2[65] cents** per head or **$26.50 per 1000 sheep,** I have not tried it for hand curing, having a drum of 5 gallons on hand of another dip, and this has more than sufficed for all the hand-curing that has been necessary since **February last.**

I remain your sincerely
(signed) CHARLES R. KENYON.



EXTRACT OF TOBACCO.

According to numerous testimonials which we hold the extract of pure tobacco is the only infallible remedy to radically cure the scab in sheep and naturally the cheapest. As there are several trade marks like ours care must be taken to see that the extract bears the key marks, without which it is not genuine.

Directions for use

One part of extract mixed with 100 to 150 parts of hot or cold water for bath, and with 80 to 100 parts for hand curing.

1 a xp

DR. J. COLLIS BROWNE'S

CHLORODYNE.

The original and only genuine

Advice to Invalids.—If you wish to obtain quiet refreshing sleep, free from headache, relief from pain and anguish, to calm and assuage the weary achings of protracted disease, invigorate the nervous media and regulate the circulating systems of the body, you will provide yourself with that marvellous remedy discovered by D. J. Collis Brown, (late Army Medical Staff), to which he gave the name of CHLORODYNE, and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis Asthma.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis, etc.

From Symes & Co., Pharmaceutical Chemists, Medical Hall, Simla, January 5, 1880.

To J. T. Davenport, Esq., 33, Great Russel Street, Bloomsbury, London. Lear Sir,—We embrace this opportunity of congratulating you upon the widespread reputation this justly esteemed medecine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan; but all over the East. As a remedy for general utility, we must question wether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are so sorry to say, are now relegated to the native bazzaars, and, judging from their sale, we fancy their sojourn there will be but evanescent, we could multiply instances "ad infinitum" of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Crampas, Neuralgia, the Vomiting of Pregnancy, and as a general sedative that have occurred under our personal observation dury many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's from a firm Convlction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate Breach of Faith on the part of the Chemist to prescribe and Patient alike. We are, Sir, faithfully yours, Symes and Co., Members of the Pharm. Society of Great Britain. His Excellency the Viceroy's Chemists.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. Collis Browne, was, undoubtedly, the Inventor of Chlorodine; that the story of the defendant Freeman was deliberately untrue, which he regretted to say, had been sworn to.—See the "Times," July 13, 1864.

Sold in bottles at 1s. 1 1/2d., 2s. 9d., 4. 6d., and 11s. each. None is genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government stamp. Overwhelmning medical testimony accompanies each bottle.

CAUTION.—Beware of Piracy and Imitations.

Sole Manufacturer—J. T. DAVENPORT, 33 Great Russell Street, Bloomsbury, London
